Topics	Discussion	Information/Action Plan
	<u>Leader</u>	
I. Welcome and	S. Murphy	The meeting was called to order at 12:30 p.m. Introductions were made.
Introductions		
A. Minutes	S. Murphy	The March meeting minutes were accepted as written.
II. New Business		
A. Stop the Bleed – Delaware Initiative	D. Hainsworth	The <i>Stop the Bleed Campaign</i> has been taken on as part of Delaware's Hospital Preparedness grant. EMTs and paramedics have been trained and the goal is now to train the immediate first responders and the public. A computerized partial leg mannequin that simulates a traumatic amputation was made available at the meeting for viewing. Two were purchased as resources for the state. One mannequin will be located at the Fire School, to be used by police, EMTs and other first responders, and the other will be available to borrow for training from the EMS and Preparedness Section office. National Homeland Security/FEMA will present a webinar "You are the Help until Help Arrives" on June 15 at 2:00 p.m. The email notice will be forwarded to TSC members. The webinar is free and open to all.
B. Dover Air Force Base	D. Hainsworth	"Thunder Over Dover", an Open House/ Air Show will be held August 25, 26, and 27 at the Dover Air Force
Upcoming Events		Base. Hospitals wishing to participate with an educational display should contact Lt. Colonel Riley.
C. Other	R. Tatineni	Dr. Tatineni presented information on seatbelts in school buses. Delaware law does not require seatbelts on school buses though it does require seatbelt use in other vehicles. Six states have school bus seatbelt legislation in place, but implementation has been varied due to inadequate funding. 14 other states have attempted to pass legislation without success in the past five years. The National Highway Traffic Safety Administration (NHTSA) currently recommends all school buses be equipped with three-point lap/shoulder seat belts. It also says that school buses are the safest form of transportation for children. The challenges to passage of school bus seatbelt laws include resistance due to the costs, political repercussions from bus company lobbyists, and difficulty with enforcement. The group did not object to pursuing the issue and a suggestion was made to contact Patty Miller of Nemours Health & Prevention, who led a successful campaign to pass ATV legislation. Sean Elwell and Steve Murphy will assist in contacting Patty.
IV. Unfinished Business and	V. Unfinished Business and Reports	

M. S. Jones	There has been no movement forward. Bishop & Associates submitted a proposal but no response has been decided upon. They have successfully worked with other states to obtain trauma system funding (100% success rate/10 states) and provided a cafeteria-type work plan where components of the proposal could be chosen. Four action steps were developed when TSC members met with the Delaware Healthcare Association Policy Committee in April 2016: 1) Perform a Trauma System fiscal needs assessment and/or gap analysis to identify specific system areas in need of support; 2) Develop a more accurate method of determining trauma-related hospital costs; 3) Review information on ways other states are funded and how they distribute the funds; 4) Move the anniversary event to the Fall so that more legislators may attend and be made aware of what the Trauma System has accomplished. Item 4 has been completed.
M.S. Jones for M. Mitchell	ACS visits are confirmed for Bayhealth/Milford for July 12-13 and for Saint Francis for July 13-14. Beebe Healthcare is tentatively scheduled for October and it is hoped that Wilmington Hospital's visit can be piggybacked before or after Beebe's.
Evaluation C	Committee Report
M. Neumann	The Collector Automap issue has been resolved and 2016 mechanism of injury data can now be run. The data needed for the Nemours Prevention Branch ATV legislation follow-up report can now be provided. Mr. Neumann provided several graphs on Trauma System patients with an Injury Severity Score over 24 by outcome, and one showing the mortality rate of all Delaware Trauma System patients 2000-2016, which is consistently lower than the corresponding National Trauma Data Bank mortality rate. Assault rates per 100,000 population in 2016 compared to 2012 have gone up in New Castle County but decreased in the other two counties. He also presented information on <i>Issues with ISS Calculation Based on AIS Version</i> .
R. Megargel D. Hainsworth	New standing orders went into effect May 1 st for paramedics. Providers are being cautioned not to come into direct contact with "white substances" on calls due to significant adverse effects drugs can produce. Nationally there have been several incidents of harm to providers from chemicals at scenes. Dispatch is working on the technical ability to handle 911 texting. A legislative resolution has been introduced that would require current ED waiting times to be made available to prehospital providers while on calls. A white paper has been developed addressing the impact such a requirement
	M.S. Jones for M. Mitchell v Evaluation C M. Neumann R. Megargel
